

Liberty Memorial Invitational

Featuring

Touchstone Energy East Electrally

Location:

National WWI Museum and Memorial Park

1 Memorial Dr

Kansas City, MO 64108

GPS 39.076910, -94.587117

****The National WWI Museum and Memorial has a different address than the Park. GPS will take you to the wrong side of the park/facility if you use the wrong address. The exact GPS coordinates that you want to use for access to the park and the Pit Area is 39.076910, -94.587117 or 1 Memorial Dr.**

Schedule:

- 7am – Set-up
- 8am – 9:30am Registration (Located in tent)
- 9:45am Driver/Lap Counter meeting at Registration Tent
- *10:30am 11:30am – Race Heat #1
- 11:30am 12:30pm – Lunch
- *1pm – 2pm Race Heat #2
- 2:30 – 3pm (If Needed) Practice Heat #3
- 3pm – Awards (Victory Lane)
- *(Race times may vary)

Arriving to the Pit Area:

- In order to create the closed loop for the track, Kessler Rd, Memorial Dr, and Wyandotte St will be closed by 7am. To access the Pit Area, you will need to go through the barricade and enter Liberty Memorial Drive from the South via Kessler Rd (from the east/north east), Memorial Dr (from the west/northwest), or Wyandotte St (from the south). **We will have parking attendants on-hand to allow your truck and trailer through the barricade.**
- Please have any other vehicles in your party park in the designated parking areas. They will not be allowed in the pit area.
- Expect road construction and delays downtown. Kansas City is undergoing a major sewer improvement project mandated by the EPA that has impacted many main roads.

COVID19

- Please wear masks when entering the registration tent. Outside of the registration tent, masks are recommended but not required.

Competition

- The overall length of the track is 2395 ft. The straightaways are 1008 ft. More than likely, both corners will be under caution corners as no passing zones.

Drone Demonstration Area—We will have a Drone FPV racing demonstration that will begin during the lunch and run all afternoon. Professional pilots will be demoing student built 5-inch (prop diameter) racing drones.
